Creating XF Rigs and functional fitness training rig solutions

QUALITY CONSTRUCTION

Strong sturdy steel tubing and durable powder coat finish

CUSTOMISED CREATIONS

Use the rig pieces, components and attachments to create rig solutions to meet all your facility needs

BUILDING BLOCKS

A SIMPLE RIB WITH MANY USES

The Eleiko XF 80 Rib is a versatile piece used for building wall bars at the end of a rig, monkey bars along the top, or creating additional pull-up stations. The ribs are available in both 1100mm and 1720 mm widths. The bars are constructed from a robust steel pipes, with an outer diameter of 34 mm and a thickness of 4 mm, which have been welded together with the attachment plate.
