

**DESIGNED FOR**

Creating XF Rigs and functional fitness training rig solutions

**QUALITY CONSTRUCTION**

Strong sturdy steel tubing and durable powder coat finish

**CUSTOMISED CREATIONS**

Use the rig pieces, components and attachments to create rig solutions to meet all your facility needs

# MULTIPURPOSE STATION

## PULLS-UPS ON ONE SIDE, MUSCLE-UPS ON THE OTHER

Eleiko's DS Balk is a robust triangular shaped assembly that features three beams, two that are 33,7 mm and one that is 28 mm. This allows you to determine the diameter of your stations, giving users options.

The grip is gentle on the skin but still firm enough for maximum performance. The DS Balk comes in both 1100 mm and 1720 mm widths and is mounted between two legs at the top of the rig. The bars are constructed from a robust 4 mm steel tubing that is welded to a durable attachment plate.

**ARTICLE CODE**

3003118-01

**LENGTH**

1100 mm / 43.31 in.

**WIDTH**

450 mm / 17.72 in.

**HEIGHT**

450 mm / 17.72 in.
