

DESIGNED FOR

Creating XF Rigs and functional fitness training rig solutions

QUALITY CONSTRUCTION

Strong sturdy steel tubing and durable powder coat finish

CUSTOMISED CREATIONS

Use the rig pieces, components and attachments to create rig solutions to meet all your facility needs

MULTIPURPOSE STATION

MUSCLE-UPS AND PULL-UPS IN ONE STATION

The XF 80 Multibar integrates seamlessly into the top of a wall bar configuration to create a small overhang or between uprights to create a station appropriate for both muscle-ups and pull-ups, and accommodate users of varying heights. The balanced grip is kind on the hands without sacrificing performance. The Eleiko XF 80 Multibar is unique in that it can be mounted between two legs as a single module or doubled up connecting two Eleiko XF 80 Multibars units for a total length of 4560 mm, and does not need an upright in between.
